

## Career monitoring

The CNSMD of Lyon has a Professional Integration Observatory whose purpose is to study the evolution of the graduates' careers.

The Observatory answers the demands issued by various institutions, such as the CNCP (National Commission on Professional Certification) or the CEREQ (Centre of Studies and Research on Certification), which carries a national enquiry every three years on all graduate students' professional integration.

### + 3 Years Enquiry

Since 2008, the CNSMD of Lyon has also been inquiring about its graduate students' life 3 years after their graduation. The study is based on specific questions about their professional path and their entrance to the professional world.

To see the results of this enquiry, click [here](#) (in French).
