

Film music (composition, image analysis, m.a.o)

One of the main objectives of this training is to develop the artistic world of its composers, to train authors. It allows them to realize and accompany personal projects with a follow-up of the teaching team and personalities. It covers all the skills and knowledge necessary for the realization of professional projects and sets up a certain number of devices putting the students in real conditions, with a view to their professional insertion (realization of models, sessions in studio, cine-concert , etc.).
